EMPLOYER TRENDS

DIRECT PRIMARY CARE

Unlocking the Future of Healthcare: Join the DPC Revolution!

Healthcare costs continue to increase while employers and employees are stuck with limited access to busy, overscheduled primary care providers. Traditional health plans fall short, and the need for a revolutionary solution has never been more pressing. Enter Direct Primary Care (DPC) – the game-changing primary care model that thousands of forward-thinking employers are embracing.

DPC operates on a subscription-based model, where a simple monthly fee grants patients access to near-unlimited primary care services.

Curious about the impact? Our Hint Health Data Analytics team delved into our database, analyzing information from:

3.5K+

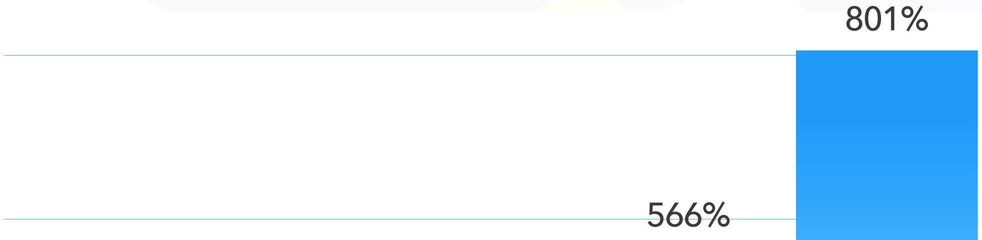
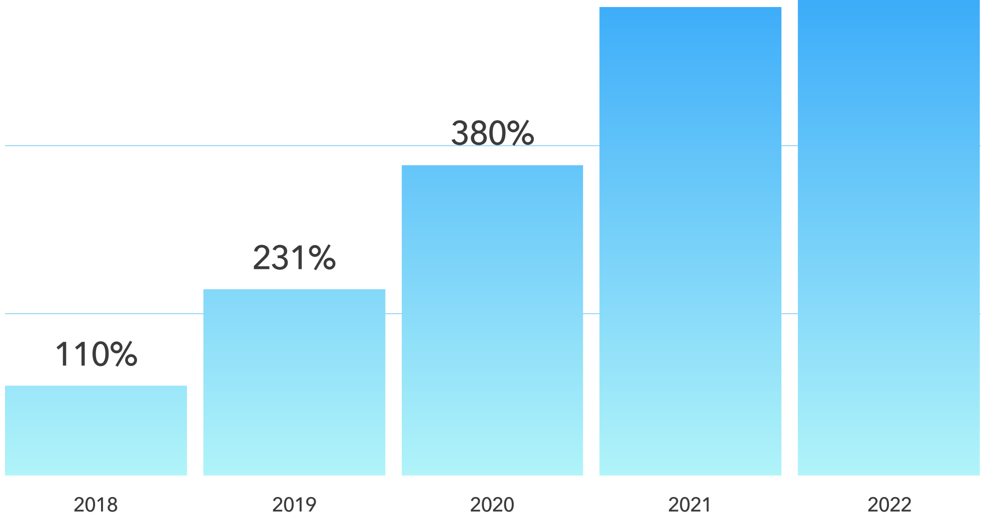
Employers

Employers providing DPC benefits skyrocketed in 2022, with over 6,500 now offering DPC memberships.



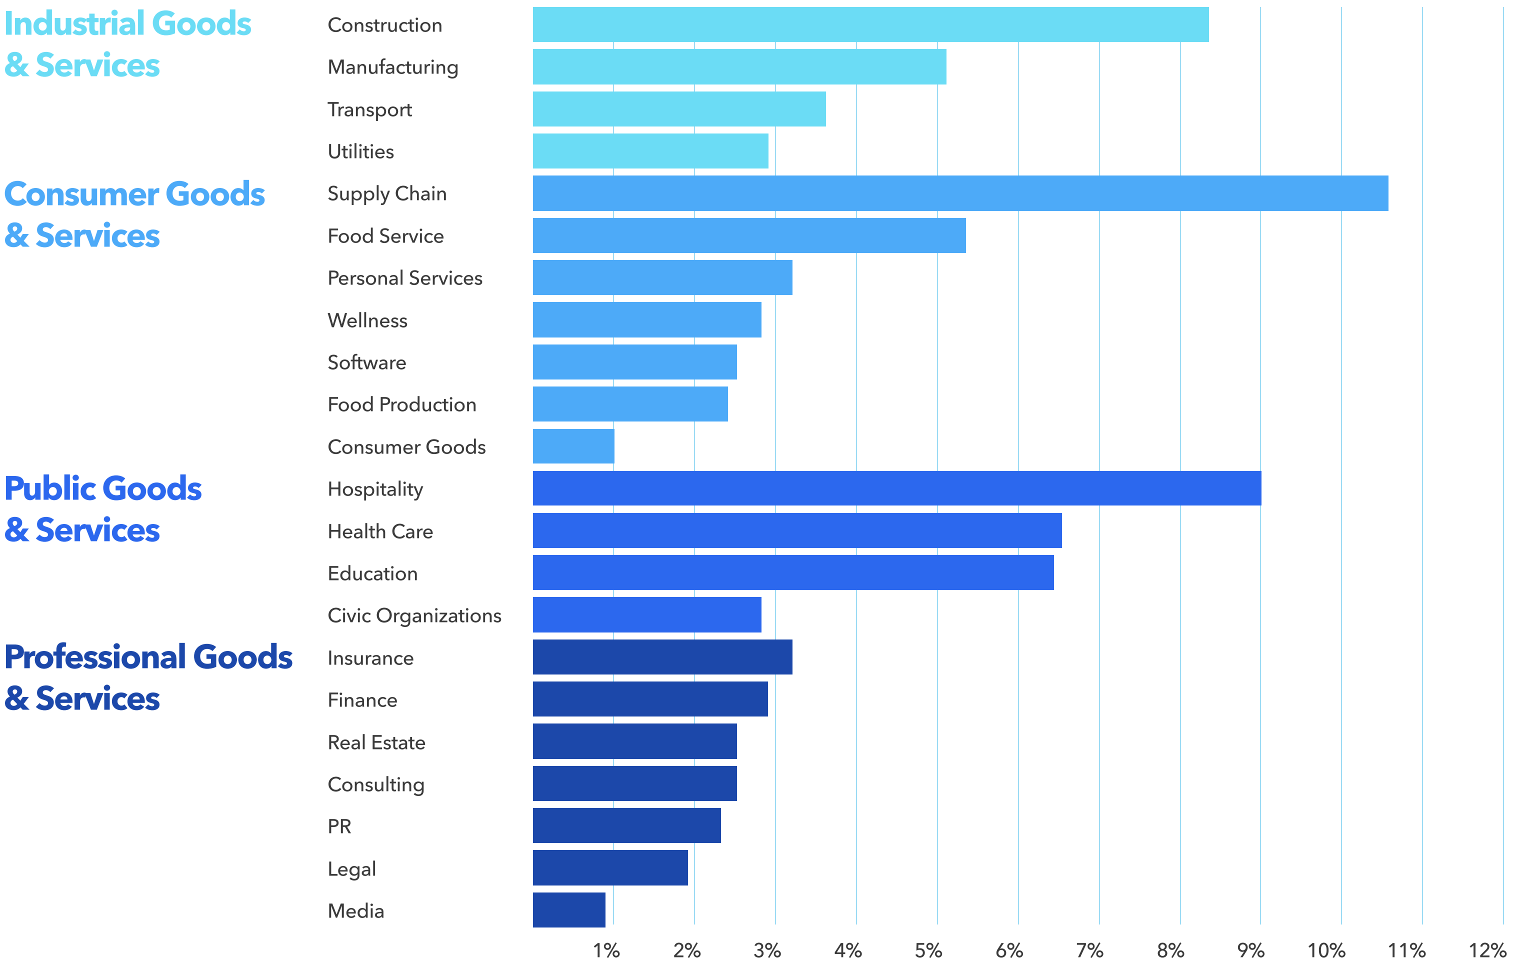
89%
of employees rank healthcare as the most important



benefit offered by employers

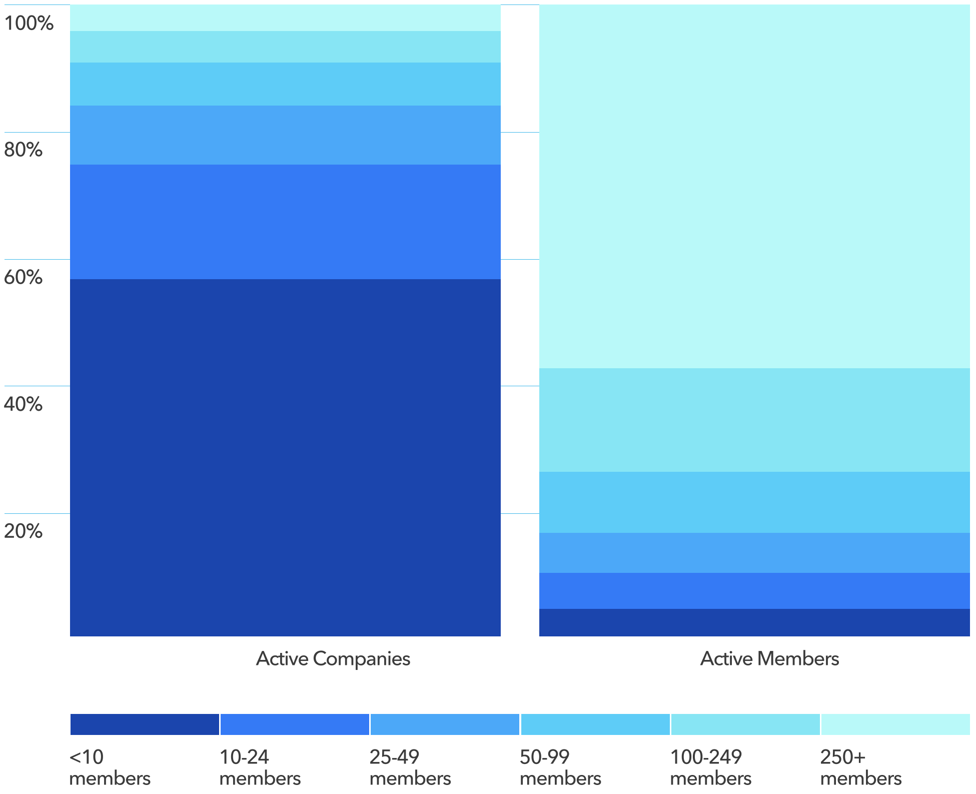
79% of working-age adults surveyed would use DPC if offered by their employer

From small businesses to large enterprises and across a wide variety of industries, DPC proves its versatility.



Hint Connect makes it possible for larger and more dispersed employers to easily offer DPC to their employees.

57%
of enrolled DPC members are employed by large companies (250+ employees)



Employer size by proportion of all active employer-sponsored members and all active sponsors in the U.S. in 2021

A Milliman/Society of Actuaries study showed that compared to employees in traditional health plan, employees enrolled in DPCs had:

12.6% ↓ **lower overall claims costs**

40% ↓
fewer
ER visits

8% ↓
lower
inpatient spend

5% ↓
lower outpatient
surgery costs

53% ↓
lower

20% ↓
fewer

ER spend hospitalizations

Chaparral Boats case study

$1M+ Cost savings over 2 years

> “We’ve saved over a million dollars in healthcare costs with this plan and we expect to see those savings moving forward.”

Jeff Smith,
CFO Chaparral Boats

> “Our goal is to reduce expenses for employers by getting employees away from expensive downstream care, such as unnecessary referrals, ER visits, urgent care, and medication dispensing.”

Dr. Wade,
Orchard DPC

Value of the claims avoided by partnering with a DPC

235k

Value of lab fees saved by partnering with a DPC

> “The old primary care model had me waiting weeks for an appointment with my primary practitioner. I wanted to get away from having the doctor spend more time looking at their laptop and rushing through my visit to see the next appointment.”

TC,
DPC Patient

Hint Connect is a national network of independent DPC practices designed to increase access to DPCs for larger employers.
